

Setting up the Wasp MobileAsset smart phone/tablet demo application.

The Wasp MobileAsset smart phone app can be downloaded to any Android or iOS smart phone or tablet. For the purpose of testing or trialling the application it can be connected to the Wasp demo server using the following setup procedure:

1. Download the MobileAsset app from the relevant app store (note, when searching there is no space in between “Mobile” and “Asset”).

Android: https://play.google.com/store/apps/details?id=com.wasp.mobileasset&hl=en_GB

iOS: <https://itunes.apple.com/gb/app/mobileasset/id860285809?mt=8>

2. Once installed on your device, use the “Service URL” as <http://mobileasset.waspbarcode.com:10008>

3. Set the device name as your company name and then the word test, so we would be WaspBarcodeTest

4. Once this has been done, you can use the following details to logon:

Username: app1

Password: wasp
